

Processing Insurance Claims with Spectrum Practice Management System

Spectrum's Insurance Claim Manager enables you to create, send and track insurance claims. All AT Veterinary Systems customers will receive a demonstration of how to process insurance claims using the Spectrum Practice Management System by their account manager. To arrange a demonstration, please contact AT on 01359 243400.

About Insurance Claims Manager

Spectrum Insurance Claims Manager simplifies the creation and management of insurance claims. You can simply select the items that make up an individual claim from an animal's financial history and track claims by owners, animal, insurance company, condition and status, from submission through to payment.

Insurance claim forms can be submitted electronically from practice to insurance company, as well as post as a paper print out.

Spectrum Insurance Claims Manager also enables for multiple claims for the same animal to be processed quickly and easily.

Return on investment

Spectrum Insurance Claims Manager reduces the time it takes to process claims by over 50% - reducing the demand on staff time and reducing costs.

Quicker processing of insurance claims also results in swift payments and improved cash flow.

Contact us

For a demonstration of Spectrum Insurance Claim Manager, please contact us on 01359 243400, where your account manager will be happy to help with a full step-by-step guide.
